

# Call Us First

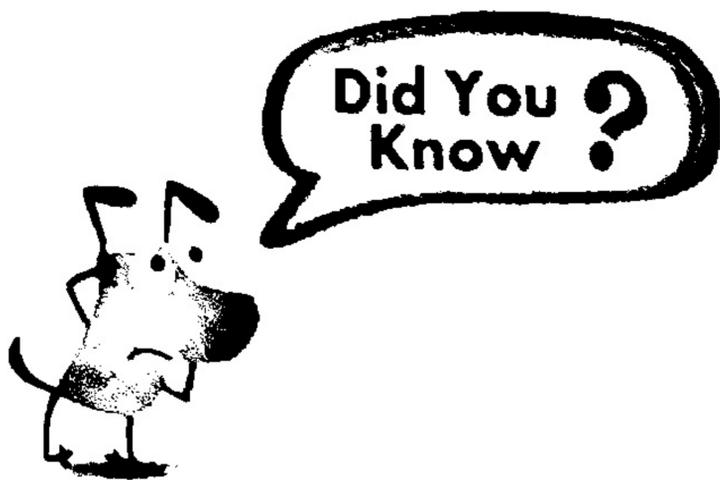

24 hours a day 7 days a week

Middleboro Pediatrics

508-947-0630

There are many reasons to call our office first before taking your child to an urgent care center or hospital emergency department.

## *100% of our patients are kids/teens*

- As pediatricians, all of our training and clinical expertise is specialized in the medical care of children and adolescents.
- Most urgent care providers and ER physicians do not have that same background in training.

## *Our ongoing relationship with you and your child matters*

- We know your child's health needs.
- We have access to your child's full health records reducing the risk for medical errors.
- We follow up with you. Our practice will call to make sure your child is doing well, or schedule an appointment when necessary.
- We provide the comfort of a familiar setting, particularly when your child is sick, which can go a long way toward minimizing anxiety and stress.

## *We not only provide the care, we help guide you to the best care*

- We can help guide you to the best and most appropriate care locations and specialists to ensure your child gets the right type of treatment.
- Calling us first allows us to help streamline and coordinate care with an ER or Urgent Care Center.

## *"Convenience" can be costly*

- A phone call to us may be able to save you the time and expense of an unnecessary ER or urgent care visit.
- Many times, we can help you manage a concern at home.

**In the event of an emergency please call 911**
